Odoo · ERP · Python · Process analysis · Systems integration · Shopify · Point of Sale · Data migration · Production management · Generative AI

Paula Gil Atienza

Functional & Technical Odoo Consultant · Industrial Engineer

PROFILE

I help companies adapt Odoo to the way they actually work. I cover both the functional and technical side: I study how each business runs, propose process improvements and bring them into the system through configuration, custom Python development, integrations, migrations, reports and user training. Focused on AI applied to business.

EXPERIENCE

ERP Solutions & Evolutive Projects Consultant
Oct 2024 – present

Mirandir · Murcia

- Support and evolutive projects area: own portfolio of clients already running Odoo, across very different industries.
- Process analysis and new features across manufacturing, purchasing, sales, inventory, POS, e-commerce and accounting.
- Custom Python module development: business logic, views and reports.
- Integrations and connectors with external apps such as Shopify.
- Version migrations, user training and issue resolution.
- Daily use of AI and involvement in integrating Odoo with AI assistants via MCP.

Industrial Engineering Intern
Jun – Sep 2024

Romar Global Care / Quimi Romar · Sagunto

- Supported the engineering lead in moving production to a new plant.
- Review of building certifications and safety of the new plant.
- Tracking of work orders and costs.

INDUSTRIES

Construction engineering
Managing each site as a project.

Bakery with production
Production, inventory and POS in one system.

Training academy
Odoo for a service business.

Cosmetics distribution
Supporting a field sales team.

Lighting
Sales to distributors and large retailers.

Online clothing store
Shopify synced with Odoo.
